

VICTOR DONALD

IT Help Desk Technician

Technical Support • Troubleshooting • Networking Fundamentals • User Assistance

202-760-7904 | Washington, DC 20011 | Victor.Donald1@outlook.com | <http://www.linkedin.com/in/victor-donald-401040420>

PROFESSIONAL SUMMARY

- **Core Experience & Tools:** IT Help Desk Technician with 2+ years of hands-on experience resolving hardware, software, and network configuration issues across healthcare, corporate, and higher education environments using Windows, Active Directory, and Remedy ticketing.
- **Quantifiable Impact & Superpower:** Distinctive ability to bridge the gap between complex technical infrastructure and everyday end-users; successfully reduced Tier 2 escalations by 25% by delivering clear, patient, and step-by-step troubleshooting documentation for non-technical staff.
- **Education & Certifications:** Backed by a completed Google IT Support Professional Certificate, a Master of Information Systems Management, and advanced training in Cybersecurity and Information Assurance.

PROFESSIONAL SKILLS

- **Operating Systems:** Windows 11/10/7, macOS, Windows Server
- **Technical Support:** Hardware & Software Troubleshooting, Desktop Support, Remote Control Tools, Active Directory Administration, Account/Access Management, Remedy (BMC) Ticketing System
- **Networking:** TCP/IP, DNS, DHCP, APIPA Remediation, VPN Configuration, LAN/WAN Fundamentals
- **Tools & Technologies:** Amazon Workspaces, Virtual Machines (VMware/VirtualBox), Command Line Interface (CLI), Deployment Media Creation, Driver Injection, Microsoft Office 365
- **Professional Skills:** Technical Documentation, Incident Logging, End-User Training, Clear Communication, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Winston Benefits – *Customer Service Representative (Contract via Robert Half)* – Remote

October 2024 – November 2024

- Resolved benefit-related inquiries for 10+ consumers daily during open enrollment, translating complex plan technicalities into clear, user-friendly terms.
- Guided 100+ users through the benefits enrollment portal, providing remote technical troubleshooting for navigation and system access errors.
- Managed high-volume customer interactions within a ticketing queue, maintaining 100% accuracy in data entry and documentation.

Association for the United States Army – *Education and Program Administrator (Contract via Robert Half)* – Washington, DC

October 2024 – October 2024

- Fielded program inquiries and provided remote technical support for members navigating online organizational portals and resources.
- Promoted organizational digital programs and services to 50+ members daily, improving user adoption and portal engagement.
- Documented member inquiries and system feedback to assist administrative teams with workflow optimization and database accuracy.

Precision Wellness – *Health Information Technician* – Washington, DC

September 2023 – April 2024

- Researched, configured, and supported Amazon Workspaces deployment, enabling secure remote access for business operations.
- Designed and developed a health information database and website platform, organizing 100+ records to improve data accessibility, accuracy, and information management processes.
- Integrated database functionality into a mobile application, enabling Bluetooth-based health information access.

National League for Nursing – Program Specialist / Administrative Coordinator
(Contract via Robert Half) – Washington, DC

January 2021 – February 2023

- Maintained member contact databases for annual surveys, updating 60–100 records daily using Salesforce CRM to ensure data integrity.
- Processed and organized survey data for 2020–2022 NCLEX HBCU initiatives, utilizing Excel and database tools to support reporting efforts.
- Provided technical and administrative support by managing electronic documentation, access permissions, and digital records.

DeVry University – Tier 1 Help Desk Technician – Arlington, VA

October 2010 – December 2012

- Resolved 20–30 daily hardware, software, and network connectivity issues as primary technical contact for faculty and students.
- Documented all incidents in Remedy (BMC) ITSM, maintaining complete case management records.
- Diagnosed and resolved computer operational issues, including software installations, configuration fixes, and Active Directory account support.
- Delivered step-by-step troubleshooting guidance for non-technical users, reducing Tier 2 escalations by 25% through first-call resolution.
- Resolved complex application access issues to maintain optimal system uptime.

George Washington University – Customer Service Representative –
Washington, DC

July 2005 – March 2020

- Delivered exceptional technical and operational support to 50–69 users daily by managing equipment distribution and hardware provisioning in a fast-paced environment.
- Managed daily facility reservations and scheduling operations using internal booking software, maintaining accurate database records.

- Communicated complex policy, scheduling, and program information clearly to students, faculty, and community members to maximize user satisfaction.

EDUCATION & CERTIFICATIONS

Keller Graduate School of Management

- Graduate Certificate in Cybersecurity & Information Assurance | *Expected: February 2027*
- Master of Information Systems Management | *October 2019*

DeVry University

- Bachelor of Science in Network & Communication Management | *December 2012*

Certifications

- Google IT Support Professional Certificate | *Completed: September 2022*
- CompTIA A+ | *In Progress*

TECHNICAL PROJECTS

PC Hardware Optimization & Storage Upgrade

January 2024 – May 2024

- **Context & Value:** Aimed to improve device reliability and extend hardware lifespan for refurbished and personal-use computer systems.
- **Technical Execution:** Performed physical hardware maintenance, internal component upgrades, SSD replacements, disk partitioning, and drive alignment verification.
- **Outcome:** Enhanced system responsiveness and minimized device failures across multiple endpoints without incurring replacement costs.
- **Skills Used:** SSD replacement, disk partitioning, storage optimization, hardware diagnostics, precision tools.

- **Portfolio:** <https://victor-donald.github.io/IT-Portfolio/hardware-optimization.html>

Enterprise Hardware Deployment & OS Specialization

June 2024 – Present

- **Context & Value:** Focused on transitioning a diverse hardware fleet from generic Windows 11 environments to locally optimized enterprise configurations.
- **Technical Execution:** Built custom bootable media using CLI tools to inject device-specific hardware drivers into master deployment files for Surface, HP, and Lenovo devices.
- **Outcome:** Eliminated active internet dependencies during deployment, slashed device provisioning times, and established a cross-platform disaster recovery baseline.
- **Skills Used:** Driver injection, OS modification, storage provisioning, bootable media management, CLI.
- **Portfolio:** <https://victor-donald.github.io/IT-Portfolio/index2.html>

Enterprise Network Diagnostics & Infrastructure Support (Academic Simulation)

October 2010 – December 2012

- **Context & Value:** Executed to restore critical simulated university administrative and student registration network workflows.
- **Technical Execution:** Diagnosed DHCP connection failures via CLI ipconfig tools, identified APIPA errors, and coordinated port resets with the infrastructure team.
- **Outcome:** Restored network connectivity under tight SLA guidelines and verified secure database access via local loopback testing.
- **Skills Used:** Network diagnostics (ipconfig), DHCP remediation, switch port configuration, loopback testing, and SLA compliance.
- **Portfolio:** <https://victor-donald.github.io/IT-Portfolio/index1.html>
